

Intervoid[®] sampling

ULTRA-SECURE SOLUTIONS FOR MEDICAL SAMPLING

DESCRIPTION

Coveris' award winning range of Intervoid[®] sampling solutions combine the highest levels of tamper-evident security and tracking technology with the option of 10^{-6} gamma irradiation sterility for improved safety and risk mitigation. Designed to enhance sample security and audit trail, the solution works to reduce time and waste whilst simultaneously improving efficiency.

Available in both sterile and non-sterile formats, all Intervoid[®] products provide a leak resistant, single use solution with tamper-evident and track and trace properties for guaranteed security and accurate traceability.

FEATURES & BENEFITS

- Tamper evident closure, featuring Intervoid[®] patented technology
- Single trip by design to avoid risk of cross-contamination or sample confusion
- 10^{-6} gamma irradiation sterile or non-sterile formats available
- Track and trace technology to provide each bag with a unique
- Available in 5 standard sizes: 50 & 100/ 250/ 500/ 1,000/ 2,000ml identification system
- Leak resistant
- Inner packaged in 10 unit formats
- UN 3373 marked

COVERIS[™]
HIGH PERFORMANCE PACKAGING

Features	Benefits
• Intervoid® tamper evident security features & patented technology	• High-spec protection for your valuable samples
• Intervoid® track & trace technology (serialisation) gives each bag a unique identification including removable receipt	• No sample confusion, plus proof of individuality of samples through a physical unique referenced receipt
• Single trip by design	• No risk of cross-contamination
• Intervoid® leak resistance closure as standard	• Keeping any potential leaks safely enclosed
• Proven & verified Sterility Assurance Level of 10 ⁻⁶ (optional)	• Ensuring your samples are free from contamination, tested to the highest level
• Can also be supplied as Intervoid® Absorbent - all of the features above, plus highly absorbent pad included	• Ensuring sterility of bag and absorbent pad as a complete system

APPLICATIONS

Providing the optimal solution for medical sampling across the entire supply-chain, Intervoid® solutions offer a secure, serialised and optionally sterile solution for the following applications to prevent cross contamination and eliminate unnecessary waste.

- **COLLECTION:** Chemical and microbiological analysis
- **TRANSPORT:** Government agency quality control
- **STORAGE:** Ultra-secure, FDA compliant sample storage
- **PACKAGING:** Secure, traceable, protective solutions for secondary processing
