NOBLESSE[®]

MICROTOME BLADES

Ideal for General Paraffin & Cryostat Applications

Our new **NOBLESSE[®]** blades offer advantages that can help simplify the sectioning process.

NOBLESSE[®] low and high profile blades are manufactured to optimum thickness with precise edge geometry so that they can be used without the need to make angle adjustments.

Our patented **NOBLESSE[®]** coating produces quality ribbons in fewer cuts, saving time and extending blade life. The no-hole design creates the strongest and most precise blade possible.

Low Profile Product Number 9000

Profile	Low
Dimensions	80mm x 8mm
Blade Angle	35°
Material	Stainless Steel
Blades Per Dispenser	50 Blades
Blades Per Case	50 Blades
Application	For all tissue types

New Ergonomic Dispenser

High Profile Product Number 9100

Profile	High
Dimensions	77mm x 14mm
Blade Angle	35°
Material	Stainless Steel
Blades Per Dispenser	50 Blades
Blades Per Case	50 Blades
Application	For all tissue types
