

AGANI™

Hypodermic needle

Product Solutions

Your needles of choice
for a wide range of applications

The TERUMO logo consists of a red swoosh above the word 'TERUMO' in a bold, green, sans-serif font.

The safety and
comfort of your patients
is in your hands.

Injection & Access

Smooth and easy puncture increases patient comfort.

Make the administration of medication as painless as possible with the special geometry of the sharp lancet point and silicone-coated cannula that allows a smooth penetration and prevents any knocking effect.¹

Precisely shaped needle point
with silicone coating.

Agani hypodermic needles have a sharp lancet tip and an outside layer of silicone lubricant.

**The sharp
point**

- Facilitates the penetration of the skin
- Helps to minimize the trauma

**The silicone
coating**

- Provides good gliding properties
- Allows a smooth insertion

Secure and easy handling

increases safety and user comfort.

The steeper point angle of the short bevel² shortens the length of the needle bevel, thereby reducing the risk of vascular perforation.

The outside diameter of the needle can be recognized by the ISO colour-coded hub.

- Easy identification of the required size
- Easy recognition of flashback through the semi-transparent hub

All needles come sterile, individually packed in color-coded blister packaging.

- Supplied in boxes of 100 needles
- Comprehensive information on the packaging

Choose from a wide range from 18G up to 30G.

18G Cannula (ø 1.2 mm)

Length 38 mm
Colour Pink

19G Cannula (ø 1.1 mm)
